

## Match Game

This game consists of two contestants and 3 – 10 group match members. The object is for the contestants to match as many correct answers with the ‘match members’ as possible. You can play one to three rounds per pair of contestants.

Contestants sit facing their match member panel. Each match member is given a piece of paper (or chalkboard or dry-erase board). The host says one of the phrases below and the match members write down their answers but don't reveal them. One of the contestants then answers as he/she sees fit. The match members then show their answers and the contestant gets a point for each “match member” her answer matched.

As always, feel free to add phrases pertaining to your party theme and/or crowd. You can even add more lengthy phrases to add innuendos and laughter (see list).
